SUMMARY

Full-stack Software Engineer with experience delivering end-to-end features for AI-powered marketing and CRM platforms. Skilled in Python, Django, MongoDB, PostgreSQL and JavaScript, with strengths across domain modelling, service-layer design, data workflows, responsive interfaces and automated testing. Experienced deploying Django updates to AWS EC2 development environments through SSH, using IAM-controlled access and AWS CodeCommit.

SKILLS

Languages: Python, JavaScript, Java, SQL, R, VBA
Back end: Django, FastAPI, REST APIs, Celery, service-layer design
Front end: Vue.js, React, HTML5, CSS3, responsive UI, accessibility/WCAG, Bootstrap
Data: MongoDB, MongoEngine, PostgreSQL, Pandas, Microsoft Access
Cloud and DevOps: AWS EC2, IAM-controlled access, AWS CodeCommit, Git, GitHub Actions, Vercel, Railway, Cloudflare
Practices: Full-stack development, data modelling, CI/CD, automated testing, validation, agile delivery, technical documentation

WORK EXPERIENCES

Robotic Marketer 2026.05 - 2026.08
Software Engineer Intern Melbourne, Australia

Description: Developed full-stack features across the Campaign Centre and CRM modules of an AI-powered marketing platform, supporting campaign planning, customer and sales workflows, analytics and cloud-based delivery.

Technologies: Python, Django, MongoDB, MongoEngine, JavaScript, HTML5, CSS3, Celery, Git, AWS EC2, IAM, CodeCommit

- Engineered end-to-end web features using Python, Django, MongoEngine and JavaScript, covering data modelling, service-layer logic, server-side validation, Django templates and responsive front-end interfaces.
- Designed MongoDB document structures and reusable business logic for complex lifecycle, financial and performance workflows, including budget variance, ROI, ROAS, readiness and engagement scoring.
- Built reusable data-import and export infrastructure supporting 3 input formats and 4 output formats, with column mapping, full-file validation, duplicate detection, access isolation, rollback handling and spreadsheet security.
- Developed analytics dashboards and scheduled data-processing workflows with Celery, presenting financial, operational and performance metrics through responsive and accessible UI components.
- Performed daily deployments to an AWS EC2 development environment through SSH, using IAM-controlled access and AWS CodeCommit to manage updates, restart Django services and verify releases.

Hangzhou Youzan Technology Co., Ltd 2021.06 - 2021.08
Python Developer Intern Hangzhou, China

Description: Internal finance data automation and reporting workflow for affiliated-company funding and account operations.

Technologies: Python, Pandas, Excel/VBA, SQL, Office 365

- Developed Python scripts to clean, reconcile and consolidate funding/account data across 100+ account types for 30+ affiliated companies.
- Migrated repetitive Excel-based checks into Python/Pandas workflows, reducing manual handling in funding-status analysis and variance review.
- Automated generation of finance data summaries and draft report tables to support auditing, brokerage investigation and cross-department account operations.

COURSE PROJECT

Full-Stack Web Developer – inflowence.org

2025.03 - 2025.06

Full Stack Developer

- Led development of a digital-citizenship platform for content creators in a self-managed, agile team, collaborating closely with industry and academic mentors.
- Built responsive, accessible UIs using Vue.js—applying WCAG guidelines and Norman’s design principles—to ensure an inclusive user experience.
- Engineered RESTful back-end services with Python FastAPI, integrating a PostgreSQL database hosted on Railway for robust data storage and retrieval.
- Orchestrated CI/CD pipelines with GitHub Actions, deploying the front-end on Vercel (behind Cloudflare) and the back-end on Railway; configured CORS and environment variables for secure cloud deployments.
- Demonstrated professional practice by delivering 75% of unit assessment through working prototypes, documentation, and presentations—showcasing entrepreneurial skills and industry engagement.

EDUCATION

Monash University

2023.07 - 2025.05

Master of Information Technology

The University of Nottingham Ningbo China

2019.09 - 2023.07

Bachelor of International Business Economics (Honours)
